Chicago Riverdale Lumber Co.

Wholesalers to the Contractor

RIVERDALE
CHICAGO

Contractors' Catalogue
No. 37

We show on the following pages a variety of Millwork and Interior Finish, and try to carry in stock

Only the Up-to-Date Things

OUR MILL

which is strictly "Union," is equipped with the best machinery, dry kiln, etc., and it is our aim to make shipments quicker than any one in our line.

Almost every order has some odd work which has to be made up special and which most houses advertising millwork have to depend upon others to manufacture for them. We, having our own mill, make our own

"ODD WORK"

We invite you to come to Chicago and let us show you the most up-to-date plant in the U. S., especially planned for getting out the odd and special things.

Our plant is at Riverdale, Chicago, on the Illinois Central suburban line. Trains leaving Randolph St. Station every hour. Also South Side street car lines will take you to our plant.

Chicago Riverdale Lumber Co.

SEND PLANS OR LISTS FOR DELIVERED PRICE ESTIMATES

Directions for Ordering

AND MAKING LISTS FOR ESTIMATES

Follow them, giving all particulars, and we can figure your lists and enter your orders immediately. Otherwise we are obliged to write for more information.

Give Width First—Then Height

In all Millwork this is the universal rule:

2-5x1-4 always means 2-5 wide by 1-4 high.
1-4x2-5 always means 1-4 wide by 2-5 high.

WINDOWS AND SASH

TERMS USED AND WHAT THEY MEAN

Sash indicates a single piece.
Window means two pieces, an upper and a lower sash, made with either plain or check rail.

For regular sizes give all the following information in the order named:

1st Size of Glass. 2nd Number of Lights. 3rd Thickness of Wood.
4th If Windows, whether Plain or Check Rail.
5th State if Open or Glazed and describe kind of Glass required.

For odd sizes give size of opening to be filled in addition to above description.

Measurements in inches always mean glass size; in feet and inches they mean the outside measure or opening.

ILLUSTRATION:

1 Sash 24x36 — 1 lt., means glass size.
1 Sash 2-4x3-5 — 1 lt., means the opening size is 2 ft. 4 in. wide and 3 ft. 5 in. long.

DOORS

Always give all the following particulars in the order named:

1st Width. 2nd Height. 3rd. Thickness. 4th Quality.
5th Number and Arrangement of Panels.
6th If Door has Name or Number, give that.
7th If Door is Glazed, state Size of Glass and whether D. S., Plate or Figured, etc.

MOULDINGS AND CABINET WORK

BE SURE TO SPECIFY KIND OF WOOD WANTED

IMPORTANT — If you give numbers from any other catalogue, state whose book and date of issue.

Splendid Quality has made our Millwork Popular.

SAFE DELIVERY GUARANTEED

PROVIDING YOU COMPLY WITH THE FOLLOWING INSTRUCTIONS

If goods do not arrive within a reasonable time, notify us, and our Traffic Department will promptly trace the shipment until it arrives at destination.

HAVE YOUR RAILROAD AGENT MARK EVERY SHORTAGE, BREAKAGE OR DAMAGE ON FREIGHT BILL

Do not sign receipt or pay freight or express charges until you have compared the NUMBER of bundles, pieces, etc., called for on our Bill of Lading, with that shown on the freight bill, and if there is any evidence of shortage, breakage, or damage of any kind, have railroad agent make notation to that effect on the freight bill, before you accept shipment. Then notify us at once and enclose the marked freight bill. If there is any shortage, we will trace missing material and in case it does not turn up in a few days, will duplicate it free of charge on condition that the missing items will be refused by you in case they arrive afterward. In case of breakage or damage if there is not time to return goods for repairs, have articles put in good condition locally, send us bill and we will send you our check for the amount.

These instructions apply on all shipments whether transportation charges are prepaid or collect.

Follow these instructions and we guarantee to stand between you and any possible loss or damage.

Chicago Riverdale Lumber Co.

Slate Surfaced Shingles

RED and GRAYISH GREEN

Nature's Own Colors—Will Never Fade

Slate Surfaced Shingles retain their rich color always. They are surfaced with real red or greenish gray crushed slate in natural colors. GUARANTEED TO OUTWEAR WOOD SHINGLES. **Waterproof CLEAR THROUGH the roofing felt with asphalt saturation.** The crushed slate embedded in extra asphalt coating furnishes a never fading color, and makes the roof **practically fireproof.**

THE ONLY SLATE SURFACED SHINGLE ON THE MARKET THAT WILL NOT CURL

ALL SHINGLES ARE OF UNIFORM SIZE, 8x12¾ inches. Unlike wood shingles there are no culls to be thrown away; there is no labor wasted in selecting the proper sized shingles for the proper place. Can be laid with less labor than wood shingles and look better than a slate roof.

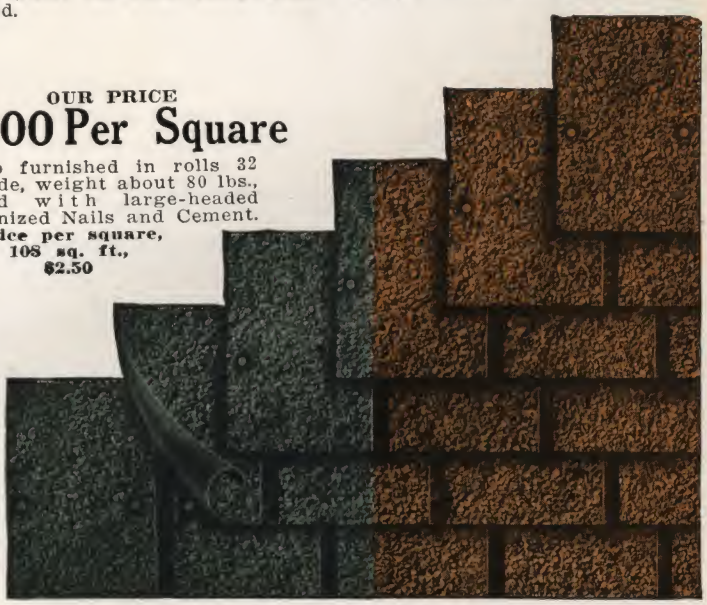

Packed four boxes to the square, each box containing enough shingles to cover 25 square feet when laid 4 inches to the weather and ½ inch apart; 424 shingles will lay one square of 100 square feet. 424 shingles will cover as much surface as 900 wood shingles laid 4 inches to the weather. Can be laid on the same sheathing as wood shingles, even if roof boards are from 1 to 2 inches apart. This means quite a saving where old wood shingles have to be removed and shingles substituted.

OUR PRICE

$5.00 Per Square

Also furnished in rolls 32 in. wide, weight about 80 lbs., packed with large-headed Galvanized Nails and Cement.

Price per square, 108 sq. ft., $2.50

In displaying colors of Shingles we have followed the true colors as nearly as possible

PRICE, F. O. B. CARS, CHICAGO

Slate Surfaced Shingles can be shipped 400 miles for 44 cents.

Chicago Riverdale Lumber Co.

"Riverdale" Fire Proof Wall Board

FACE PAPER SIZED READY FOR WALL PAPERING—
AN EXCLUSIVE FEATURE

COMPARE OUR SAMPLES WITH OTHERS— THERE IS A DIFFERENCE. OURS IS THE BEST.

What is Riverdale Wall Plaster Board?

(See opposite page)

It is a non-inflammable material made with a rock plaster composition center between two thicknesses of very heavy fibre board.

An especially prepared surface paper is used in the process of manufacture. The paper becomes so saturated with the gypsum composition that it will not ignite from a direct flame.

Composition of Riverdale (see illustration): Mineral composition center, between two layers of heavy fibre board. It is 5-16 inch thick.

Riverdale is one of the greatest advancements made in building materials in years; it is an improvement over lath and plaster that should not be overlooked. The first cost is less than lath and plaster, and there is no upkeep cost.

We will guarantee it not to warp, crack or shrink, and it will not burn.

Think what the following advantages mean:

No dirty lath marks on your ceiling spoiling your decorations.

No cracks, big or little, such as lath and plaster always show.

You are free for all time from faults and dangers of lath and plaster, no cracking, no unhealthy dampness, NO SPOILING OF DECORATIONS, no falling from jars or vibrations, leaky roofs or pipes.

You have instead a permanent kiln dried wall which is put up quickly and neatly.

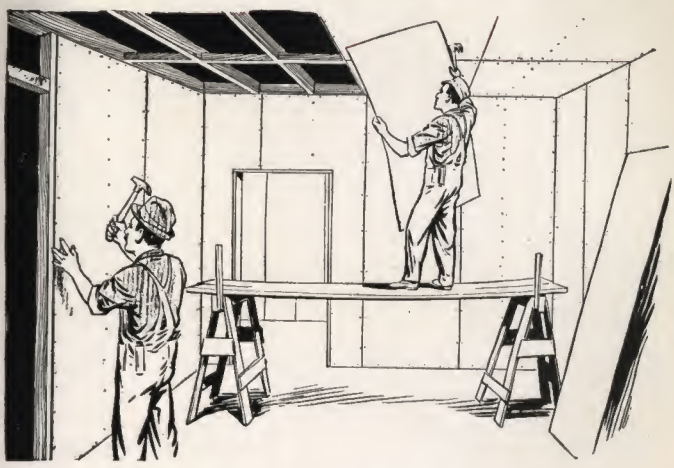

(See opposite page for prices.)

Metal Covered Store Fronts

Metal store fronts are beyond doubt the most attractive store front possible to put in. Unlike the wood fronts, there is nothing to obstruct the view of your entire window and as the metal sash cannot rot or weaken the glass is always held safely in place. A metal front is easily kept clean. There is nothing about it to rust. It is the best possible store front construction.

We cut all pieces for fronts to the exact size required, hence labor is reduced to a minimum.

LINCOLN FIR

MISSION FIR

The natural figure of the grain (especially in the veneers) so closely resembles Plain Red Oak that even under an ordinary stain, it is extremely difficult to tell it from the genuine oak.

On the other hand it is being demonstrated right along that no other wood resembles the Soft Yellow Pine as much as Old Growth Yellow Fir—when both woods are finished natural: or cypress—when both woods are placed under the same stain.

Mirror Doors

Mirror Doors are no longer a luxury—they are a NECESSITY in every up-to-date residence.

SIZES LISTED BELOW CARRIED IN STOCK

1⅜ in. thick, glazed 1½ in. Bevel Plate Mirror one side—**sunk in door**

PRICE EACH—ANY ARRANGEMENT OF PANELS—5X Pan., 2 Pan. or 1 Pan.

PRICE PER DOOR

SIZE		Veneered Plain Red Oak 2 Sides	Veneered Unsel. Birch 2 Sides	Solid Pine or Fir
Width Ft.In.	Height Ft.In.			
2-6	x6-8	$22.00	$21.00	$20.25
2-6	x7-0	23.50	22.50	21.75

DIRECTIONS FOR ORDERING

Give size, kind of wood and arrangement of panels of other doors in same room. Any arrangement of panels same price. Sizes not listed made to order.

These doors should be used in bed rooms for closet doors. The best results are obtained if dresser can be placed directly opposite door, enabling party using mirror to have front and back view at same time.

NOTE.—Our competitors do not quote on beveled plate. Plain plate is worth $1.50 per door less. We recommend the use of beveled plate.

Combined Storm and Screen Doors

No. 49

No. 59

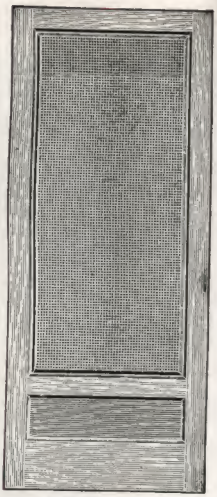

Illustration of Door With Screen in Place

Stiles 1⅛ in. by 4¾ in. wide.

Bottom rail 1⅛ in. by 9½ in.

White Pine. In the white. Door complete with glazed section; also screen section as shown. Made of White Pine.

To make door safe against sagging, joints are glued and reinforced with steel dowels.

The opening in door to receive removable sections is 4 ft. 8⅜ in. high in all doors from 6 ft. 6 in. up to 7 ft.

Removable sections are both rabbeted to fit rabbeted opening in door which provides a double lap joint, making the door dust and weather proof.

Storm and Screen sections are held in place by four fasteners of a special wedge shape pattern. When turned in place they exert a pressure on the removable section, holding it firmly and preventing rattling.

Screen section is covered with 12 Mesh Galvanized Wire.

Allow six weeks time to manufacture **Craftsman.**

The **Craftsman** style of architecture, particularly as applied to doors, represents one of the greatest forward steps ever taken in the designing of high class millwork.

For houses that depend for their attractiveness upon beauty of line and excellence of proportion, no doors that have ever been built can equal the **Craftsman** line. As illustrated, they are almost severely simple, but each possesses an unmistakable air of quiet elegance and refinement that is peculiarly pleasing to those whose likings lean toward simplicity of design.

CARE OF EXTERIOR DOORS

All outside doors should have at least **three coats** of good exterior varnish and the top and bottom edges thoroughly painted with lead and oil as soon as the door is fitted.

Our Hardwood Front Doors are made with extra heavy outside veneer to better withstand the weather.

All above doors in Birch same price

3- 0x7- 0 1¾	12.50	17.00

Birch same price.

We use the same care in the manufacture of these doors that we do in the finest cabinet work, assuring our customers of excellency of material, design and durability that is in every way **far superior to solid hardwood doors.** They are light and strong and a positive economy to every builder.

All of our hardwood doors are built in pine cores, interlocked and glued, making a door foundation that is strictly warp proof. Over this core or foundation is applied **¼-in. thick** oak veneer, a product of oak logs of the very best quality.

The veneers are glued with the very best waterproof glue, making a door absolutely weatherproof.

The veneered door properly made, is a great deal more durable than the solid door, as it will neither shrink, check nor warp.

Chicago Riverdale Lumber Co.

WE CAN HELP YOU ON

Architect's Plans

Oftentimes it is impossible for you to make an intelligent list of millwork required for a house, on account of the intricate details and plans made by the architect. If you will send us plans, details and complete specifications, **OUR FORCE OF COMPETENT ESTIMATORS** will relieve you of all that trouble.

Our Estimate Will Show You

A DELIVERED PRICE ON THE ENTIRE LIST OF ITEMS

Even if the plans are not large or difficult to figure, send them to us. We will gladly figure them for you and quote you a delivered price.

While we figure Millwork from Plans, we must ask our customers to furnish their own list of Lumber, Flooring, Shingles, etc., as we do not figure these items from plans under any circumstances.

Small orders placed with us have the same careful attention as though they were orders for carloads. It is a trial order we want.

Our Safe Delivery Guarantee

is printed on page 3. Read the entire page. It tells you what to do in case the railroad company delays or damages a shipment, or is short any bundles.

Again we remind you that

Our Millwork is Good

It is the kind that satisfies people.
That is why our business has grown so large
That is why we believe it would help you.

Bookcase and Desk Colonnade

Square Columns

Price $32.50 Glazed

Bookcase and Desk Colonnade No. 1613

The latest and most up-to-date Bookcase and Desk Colonnade. In this illustration we show the most approved Colonnade in the market. You will note that this Colonnade has, in addition to bookcase, a desk and three pigeon-holes and two drawers. By using this Colonnade you will be able to save considerable space which otherwise would be wasted. When not in use the desk can be closed and is out of the way. The columns are massive and, at the same time, it is well proportioned, and we recommend this combination Bookcase and Desk Colonnade to anyone desiring something up-to-date. The size of the bookcase is 42 inches wide, 42 inches high, and has two shelves. The leaded art glass door is 9x32 inches. Bookcase is 12 inches deep. The columns are 10 inches square, tapering to 8 inches. The cap trim and casing are not included, but could furnish if you wish at extra price. Made for 5½-inch jambs.

Price, Yellow Pine. . . .$32.50 Plain Oak. $37.50

Glazed Art glass as shown, paneled back. Jambs, casing, and cap trim not included. When ordering give height of opening, width of jambs and **kind of wood wanted.** Hardware $1.00 extra.

Bookcase Colonnade

Square Columns

Price
$32.50
Glazed

No. 1602

Perfectly proportioned and made in the best workmanlike manner. It will add a tone of refinement and luxury to your home. This bookcase colonnade can be used for any width of room. The cases are made in three lengths, 3 feet 2 inches, 3 feet 8 inches and 4 feet 2 inches wide. The ends of the cases are made to set over a jamb 5½ inches wide. The backs of the cases have two wood panels same height as the cases in front. We will furnish the colonnades in any height required. All the bookcases are 3 feet 6 inches high from the floor to the top shelf on which the columns rest. Each bookcase is 12 inches deep and has two shelves.

The corners of the columns are made of solid wood, there being no glued joints whatever. Columns are 10 inches square at the bottom and taper to 8 inches square at the top. Paneled on four sides and have molded caps and bases.

No. 1602 Bookcase Colonnade. Cases 3 feet 2 inches long, for opening any height up to 8 feet. Furnished in Plain Oak, Cypress, Birch or Yellow Pine (not oiled or varnished).

Price, Plain Oak.....$37.50 Yellow Pine.....$32.50

If cases are wanted 3 feet 8 inches long, add 75c to the above prices. If cases are wanted 4 feet 2 inches long, add $1.50 to the above price.

For each additional foot in height required for columns add 50c. Hardware, 75c extra.

NOTE.—When ordering be sure to give width and height, and the **kind of wood wanted.** Note cases are made to fit 5½ in. jamb.

Bookcase Colonnades

No. 1622

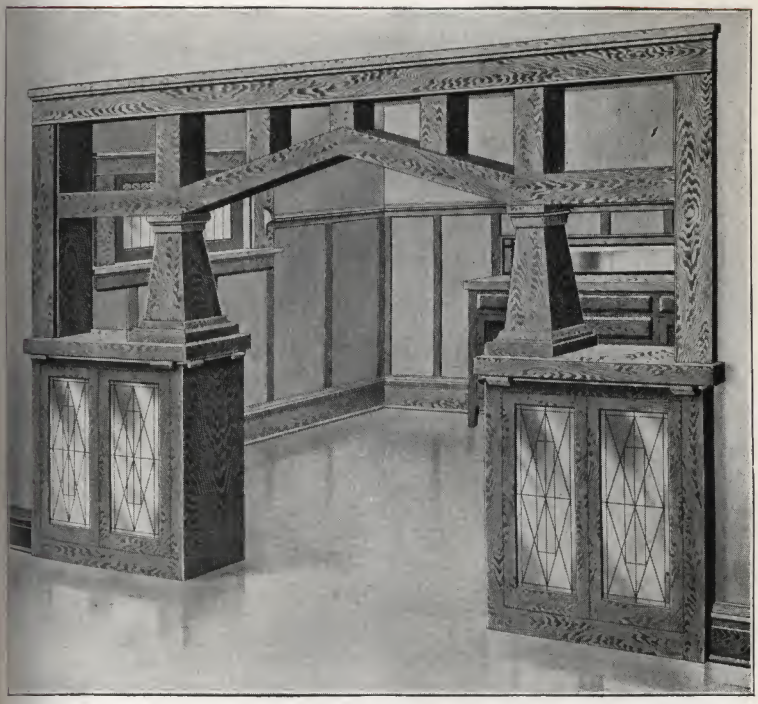

Our very best effort in a Bookcase Colonnade. You will note that this Colonnade has, in addition to 2 Bookcase Pedestals, 2 very ornamental Brackets and overhead beams, the main beam on a radius which gives the opening a rich appearance. The Brackets are massive and at the same time, well proportioned, and we recommend this Bookcase Colonnade to anyone desiring the very best Colonnade to be had at anything like this price. The size of the Bookcase is 44 inches wide, 48 inches high, and has three shelves. The glass in door is 14x35 inches divided, 9 light wood bars. Bookcase is 10 inches deep. The Brackets are 4 inch face.

Glazed D. S. glass as shown, paneled back. Jambs, casing, and cap trim not included. When ordering give width and height of opening, width of jambs and **kind of wood wanted.**

Price, any opening not over 12 ft. by 9 ft. Yellow Pine, $62.50. Plain Red Oak, $75.00.

Bookcase Colonnades

Square Columns

No. 1623

A very attractive, high-class Bookcase Colonnade. You will note that in addition to 2 Bookcase Pedestals and 2 Square Columns this Colonnade has Massive Beams overhead, which add greatly to its rich appearance. The columns are massive and, at the same time, well proportioned, and we recommend this Bookcase Colonnade to anyone desiring something better than ordinary. The size of the bookcase is 44 inches wide, 48 inches high, and has three shelves. The leaded art glass in door is 14x35 inches. Bookcase is 10 inches deep. The columns are 10 inches square, tapering to 5½ inches.

Glazed Art glass as shown, paneled back. Jambs, casing, and cap trim not included. When ordering give width, height of opening, width of jambs and **kind of wood wanted.**

Price, any opening not over 12 ft. by 9 ft. Yellow Pine, $52.50. Plain Red Oak, $65.00.

FLOOR PLAN

OLD METHODS

There was a time when merchants could store their wares on dark musty shelves AND SELL THEM—exhibiting them only when requested.

NECESSITY FOR NEW METHODS

In THESE days, however, of discriminating tastes for style and improvement, with competition straining every nerve to satisfy every demand, the proper exhibition of merchandise is being recognized more and more as THE most efficient selling method known.

PRACTICAL ADVANTAGES FOR NEW STORE FRONTS

More and more attention is therefore given by the merchant to those store fronts that ATTRACT—to a store front that will serve him as a permanent, inexpensive salesman. And owners in their turn are beginning to realize that the modern, enclosed front is a better paying proposition from a renting standpoint.

Price No. 1628—Panelwork and Glass as shown, Plain Red Oak, 8 feet high. $3.00 per lineal foot around opening.

Special Sideboard Roosevelt

Price each complete Glazed Art Glass and Bevel Plate as shown, 6 ft. wide 5 ft. 6 in. high; center, 18 in. deep; sides, 15 in. deep; both ends finished.

Yellow Pine $40.00
Pl. Red Oak. 47.50
¼-Sawed W. Oak $55.00

If Case to set in wall recess as shown in floor plan of Taft, deduct $5.00.

When ordering sideboards state if they are wanted to set out in room with both ends finished or if set in wall recess—if so send floor plan, showing width, depth and height of openings.

Chicago Riverdale Lumber Co.

Your Design of Cabinets

We illustrate in the accompanying pages a number of selections of designs of

Sideboards, Buffets, Colonnade Openings, Kitchen and Pantry Cases

which have proven very popular with our trade.

REMEMBER, we do not confine ourselves to these designs, but can manufacture CABINET WORK of any design from Architect's details or from your suggestions. If you have an idea you want worked out, send us a sketch showing measurements of space to be filled, also give us an idea of what is wanted and our draftsman will get out detailed drawings for you.

Send us a picture of a sideboard which strikes your fancy, giving us width, length and depth to fit the opening you will place it in and will make you a drawing to proper proportion showing you a picture of just what you will get. Or, we will make up a combination of a top of one of our cases and bottom of another—or if you would like a case with drawers where doors show in the cut—in fact, we'll make a drawing to suit your ideas if you will give us the idea.

We will be pleased to quote prices on application, or give any information you desire.

Our Cabinet Work

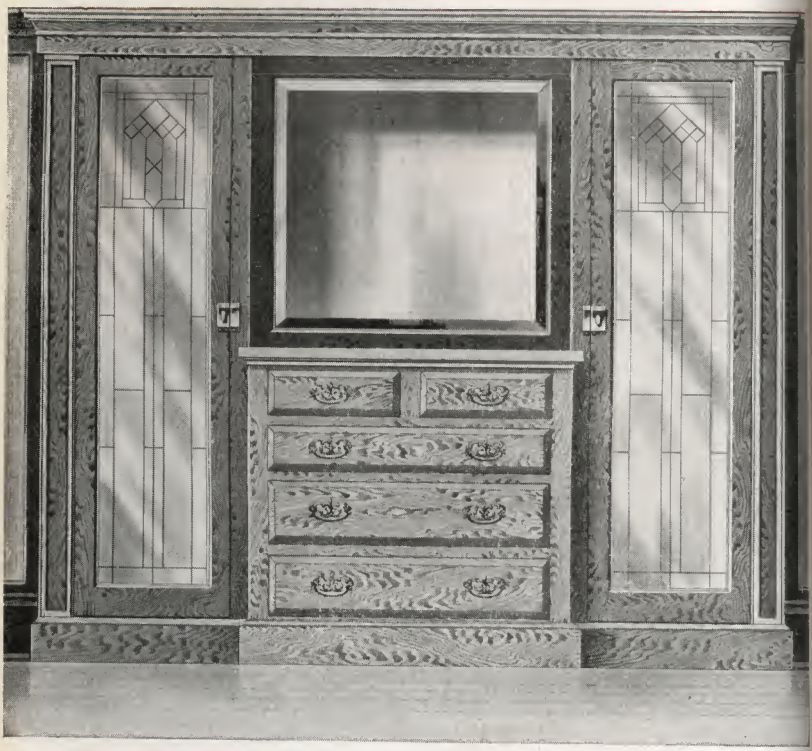

is all made of thoroughly kiln dried lumber by skilled mechanics and is the same quality as any high grade FURNITURE should be.

Our Stock Taft Sideboard

See illustration opposite page.

In Stock in Yellow Pine and Plain Red Oak

Your sideboard should serve the double purpose of providing a place for ornamental glass and china and being in itself a beautiful piece of furniture

As it is usually your most ornamental millwork feature and is subject to close scrutiny, it should be given more than ordinary care in construction.

Our Cabinet Department, having the advantages of the most skilled mechanics, selected clear lumber and perfect facilities for thoroughly kiln drying, turn out sideboards that will stand every test.

Our Stock Taft Sideboard (actual photograph on opposite page) is our most popular and best selling design.

Do you wonder how we can sell so elaborate a sideboard at the price? The demand for this design has been so heavy we manufacture them in lots of 100, reducing the cost of production 20 per cent.

Price per lineal foot.
Yellow Pine 10c
Plain Red Oak.....15c

Wall Stair Stringer and Mould should match Base and Base Mould. Send detail. Unless detail is furnished or design numbers mentioned we will furnish our 8420 and 8421.

If stringers are required housed write for special price on complete flight of Stairs—send sketch and state kind of wood wanted.

CURB OR CLOSED STAIR STRINGER No. 849

Stringboard 1¼x11¼ in.
Price per lineal foot—
Yellow Pine 12½c
Plain Red Oak....20c
Complete, 5 members.

No. 849

FACE STAIR STRINGER No. 857

13-16x11¼ in.
Price per lineal foot.
Yellow Pine 7c
Plain Red Oak.....12c

In the above illustration of Wall Stair Stringer Curb and Face Stair Stringer the dotted lines show the housing for treads and risers made to suit the exact rise and run of the stairs. On account of the fact that this cut must necessarily vary according to the height of story, etc., we do not house the stringers for treads and risers; this must be done on the job by the carpenter.

FACTS ABOUT FREIGHT CHARGES

The Freight on Millwork and Flooring is Nothing Compared to the Saving We Offer You

1000 ft. ⅜ in. Hardwood Flooring can be shipped 400 miles for.....**$2.00**
1000 ft. 13/16 in. Hardwood Flooring can be shipped 400 miles for..... **4.40**

How to Arrive at Amount of Riverdale Flooring Required

To cover a certain space, figure the number of square feet, which means the width multiplied by the length; for instance, a room 12 feet wide by 15 feet long would contain twelve times fifteen or 180 square feet. Add to the square feet of surface to be covered, the following percentages:

33⅓% for.....13/16x2¼ in.
33⅓% for.....⅜x1½ in.
25% for.....⅜x2 in.

"No Waste" Door and Window Trim

No. 132

No. 133

Order your trim as "sides of trim." Shipped in the knock-down. Well bundled. Quickly fitted. No waste. No damage in transit.

DOOR TRIM No. 132

For side of trim complete, as shown, cut to lengths.
Clear Yellow Pine.....**$0.55**
Clear Plain Red Oak..... **1.10**
In ordering simply give the "side of trim" number together with the casing number as appears and is described in mouldings: For example.

Five Sides of Trim No. 132 for Doors 2-8x6-8, Casing No. 8309.

CAP TRIM Nos. 8394, 8395, 8396

WINDOW TRIM No. 133

For side of trim complete as shown, cut to lengths.
Clear Yellow Pine.....**$0.70**
Clear Plain Red Oak..... **1.40**

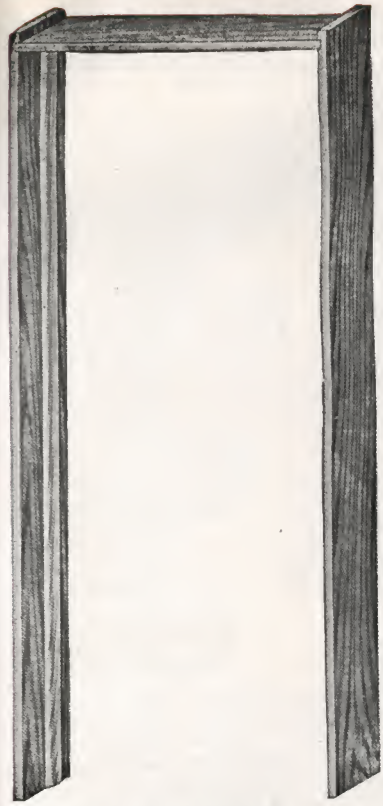

For jamb linings for 12 in. wall add—
Yellow Pine.....**$0.35**
Plain Red Oak..... **.70**

These cuts show casing No. 8309. In ordering sides of trim mention your preference as to casing patterns. We supply either at same price.

Door Jambs

OUR STOCK INSIDE DOOR JAMBS

will save you time and money. We carry all regular sizes and advise the use of stock whenever possible. These jambs are made in large quantities, which enables us to offer them below the actual retail price of the lumber in most localities. The machine work is perfectly executed and the quality of the material will please you.

Jambs made to order in any size or thickness of any kind of wood. Write for prices.

HIP SHINGLES

Ornamental Galvanized Hip Shingles are designed for the covering of hips of roofs, either straight or curved. They can be adjusted to the different widths shown to the weather.

These shingles are intended to take the place of plain tin strips, wood or metal rolls.

There is no need to make close joints in the shingles at the hips, as the offset or border at the side forms a gauge or guide by which to keep them straight.

They may be used with shingles, slate, felt or any of the flat styles of metal roofings.

"RIVERDALE" KEY EXPANDED METAL LATH PAINTED

This is by far the most practical and economical expanded lath on the market. Not alone is this due to its long life and superior efficiency, but—

To the positive fire protection which it affords;

To the ease and rapidity with which it can be applied;

To the perfect rigidity when in position;

To the small mesh, which assures no waste of mortar;

To the absolute barrier it presents to rats and mice;

To the great saving in space which its use makes possible;

To its comparatively low cost.

By its use, the absence of seams and cracks in walls and ceilings is assured, for Key Expanded Metal Lath becomes a part of the wall—not a background for it; while stained walls, caused by the use of green or wet wood lath, become impossible.

KEY EXPANDED METAL LATH

Gauge 27
Weight per square yard..... 2¼ lbs.

Scheme for Laying Ceramic Tile Floor

In laying Ceramic Mosaic Tile Floors in concrete it is first necessary that enough space be allowed for concreting and the cement bed on which the tile is laid. This requires about 3½ inches. In order to prepare for concrete the floors should be lowered between the joists as illustrated in the following plan:

The concrete to be filled in 2½ inches of this space is made of a mixture consisting of the following material:

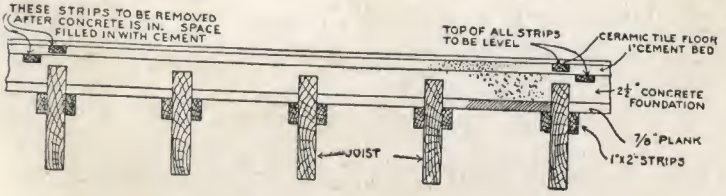

Crushed Stone Concrete

Five parts of crushed stone.
Two parts of sharp sand or creek sand.
One part of cement.

Gravel Concrete

Five part of sand and gravel.
One part of cement.

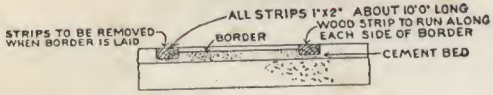

After the concrete is filled in 2½ in. thick, wood furring strips 1 in. thick by 2 in. wide should be laid on this concrete and leveled in the length and across the floor by the use of an ordinary level and leveling rod as illustrated above. After the concrete has set, a cement bed 1 inch in thickness mixed in proportion of two parts of sand, one part of cement and a very little slacked lime with it should be prepared. The lime is to keep the cement from setting too quickly, but if the job is small and the tile can be easily laid before the cement takes its initial set, no lime at all need be used. If a large floor is being laid, only about 50 square feet should be prepared at one time.

This is to be gauged off with a leveling rod the same as before, after which the strips are to be removed in this case and the space filled in with the same mixture of cement. (See page 144.)

All prices shown are F. O. B. cars Chicago, Illinois
for "FACTS ABOUT FREIGHT CHARGES" see page 145
SEND PLANS OR LISTS FOR DELIVERED PRICE ESTIMATES

Scheme For Laying Tile Borders

You are now ready to lay the tile which should have been previously laid out on the floor, bottom side up, to facilitate the finding of the proper sheets. Start at one side of the room and lay the border first, paper side up. Lay the corner pieces and then work the border from the corners to the middle so that if the space will not permit the design to work out evenly, the break or mismatch in the border will come in the middle instead of near the corner, where it would be more noticeable. The body sheets are about 2 feet long by 1 foot wide and must be laid so as to bring the dots or figures in straight lines. It is necessary to tear the paper and use a half sheet in starting the body of some of the designs. When the sheets of tile are down, level them with a block and hammer. Then remove the paper by moistening it with a sponge or brush and pulling it off gently. When the paper is all off it is again necessary to go over the floor with the block, simply rubbing it to make sure none of the little tiles are tipped up or depressed. This part of the operation should be very carefully done for when the cement once sets, it is very difficult to make any corrections. While the cement is still fresh, remove enough along the line where the setter ends his work to leave a perfect edge so that when starting the next section it will be an easy matter to connect the two.

When the entire floor is laid it is necessary to fill the joints at the surface, as the under side of the tile has only been pressed into the cement below, which rose partially toward the surface of the tile. To accomplish this, Portland cement mixed with water to the consistency of thick cream is floated over the entire surface and rubbed into the joints with a flat trowel, allowing it to set from fifteen minutes to not over twenty minutes, when some sawdust should be thrown over the entire surface and the cement removed by rubbing well the sawdust on the surface of the tile. This will give you a finished Ceramic Mosaic Floor, perfect in every respect, clean, sanitary and pure.

Following these rules, instructions and diagrams, a perfect floor can be laid in the most approved manner without the use of an expensive tilewright from a distance, or, if located in a large community where tilewrights are found, you need not pay the high rate charged for this class of work, for you will have demonstrated to yourself that you can do it as well as anyone.

FREE SKETCHES AND ESTIMATES

If Your Requirements make it difficult to order directly from these pages, send us a sketch of your room. Tell us the kind of tile desired and we shall gladly mail you a sketch and a free estimate, showing how your floor will appear when laid, and exactly what the tile will cost delivered to your station. This service is free.

COLOR DESIGNS

It Is Impossible to Show on these pages the beautiful effects that may be produced with the use of Ceramic Mosaic Floor Tile.

Where Black Is Shown for the borders or on field, we can supply red, chocolate, buff, salmon, light gray or dark gray, at a small additional charge. A slight extra charge is made for pearl, blue, sage, green and pink

Red Oak Moulding, 5% of Price.

THE FREIGHT ON HARDWARE IS SO LITTLE IT IS NOT WORTH CONSIDERING, LESS THAN 1 CENT ON A MORTISE LOCK

On an average bill of Millwork the Freight is about 3% of the total cost, and in Carload Lots it is about one-half as much.

HOW TO SAVE FREIGHT

All railroads have minimum charges, which vary in different parts of the country. As a matter of economy we suggest that our customers see that their orders include sufficient material to make shipment weigh 200 lbs. or more.

Chicago, the greatest railroad center in the world, with 48 trunk lines, reaches every city in the U. S., moving direct with quicker action than from any other shipping point.

Chicago Riverdale Lumber Co.

We Guarantee

That each and every article in this Catalog is exactly as described.

We Guarantee that any article purchased from us will satisfy you perfectly if ordered correctly.

If any article is not satisfactory in every way through our error, you can return it to us at our expense.

We will return your money including any transportation charges you have paid.

Come To Chicago

Come and see for yourself.
Come at our expense.

If you will come to Chicago and visit us and buy a carload of Lumber and Millwork or a house bill, we will pay railroad fare both ways.

Remember that we give you the advantage of our very lowest prices, and make the offer to *convince you* of the *high quality* of our material through personal inspection. The trip will be worth your while.

Chicago Riverdale Lumber Co.
